TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, Java, Go, HTML5, CSS3, PHP, C++

Frontend: React.js (Hooks, Context API, SPA), Tailwind CSS, Bootstrap 5, WebSockets

Backend: FastAPI, Flask, Node.js, Express.js, REST API Design, Socket.IO

AI / ML: LangChain, RAG (Retrieval-Augmented Generation), ChromaDB, OpenAI APIs, TensorFlow, Keras

Databases: PostgreSQL, MySQL, MongoDB, Firebase, ChromaDB (Vector Store)

DevOps & Cloud: AWS (EC2, RDS), GCP, Docker, Kubernetes, CI/CD Pipelines

Tools: Git, GitHub, Postman, Jupyter Notebook, VS Code, JWT Authentication, OAuth 2.0

Soft Skills: Problem Solving, Communication, Collaboration, Agile Development, Ownership, Teamwork, Adaptability

PROFESSIONAL EXPERIENCE

Python Developer (Full-Stack) — Softcode Infotech Pvt. Ltd. Oct 2024 – Present (Dwarka, Delhi, India)

- Architected and deployed scalable backend microservices using Python, FastAPI, and PostgreSQL, reducing API response latency by 30%.
- Built responsive, component-driven UIs using React.js, JSX, and Tailwind CSS across **5+ client-facing modules**, improving application usability and consistency.
- Engineered real-time communication features using WebSockets and Socket.IO across **4+ business applications**, enabling live notifications, instant messaging, and collaborative workflows.
- Designed and integrated **20+ RESTful API endpoints** and third-party services, improving system interoperability and streamlining backend integrations.
- Collaborated with **designers, QA engineers, and backend developers** in Agile sprints, delivering **15+ features and enhancements** on schedule.

Software Engineering Fellow — Headstarter AI Fellowship (Remote) Jul 2024 – Sep 2024 (New York, NY, USA)

- Delivered** 14 production-quality AI/ML projects including customer churn prediction, MRI-based brain tumor classification, and financial automation solutions.
- Developed** real-time chat and video conferencing applications using WebSockets and Node.js, supporting multi-user communication and collaboration workflows.
- Engineered** backend APIs for 10+ AI-powered applications, reducing integration effort and accelerating feature delivery.

KEY PROJECTS

AI - Powered Real Estate Advisor Platform | Python · FastAPI · React · LangChain · RAG · ChromaDB · OpenAI API · PostgreSQL · Tailwind CSS

- Architected a full-stack AI real estate platform featuring Retrieval-Augmented Generation (RAG) using LangChain and ChromaDB for intelligent property document analysis and Q&A.
- Integrated OpenAI APIs to power AI-driven property comparison, personalized recommendations, and natural-language Q&A, significantly improving user decision-making.
- Designed scalable RESTful APIs with FastAPI and PostgreSQL for managing property listings and user data, with JWT-secured authentication and cloud deployment on GCP.
- Built** a responsive, high-performance frontend using React.js and Tailwind CSS with optimized state management and seamless cross-device experience.

Automated Order Flow Trading Platform | Python · FastAPI · React · PostgreSQL · REST APIs · WebSockets

- Developed an end-to-end algorithmic trading website enabling real-time order placement, live portfolio tracking, and automated trade execution via broker REST APIs.
- Implemented automated trading strategy execution with rule-based triggers and risk management controls, reducing manual intervention in order workflows.
- Built a real-time dashboard with WebSockets to display live P&L, position data, and trade history, giving traders instant market visibility.

EDUCATION

B.Tech in Information Technology - College of Engineering Roorkee, Uttarakhand Technical University - Jul 2019 – Jul 2023
